

How to use precomputed data with Google colab

To use the [precomputed](#) resnet18 data for GBDA Exercise 4 simply add the following code block on top of the colab notebook! Enjoy!

```
!gdown --fuzzy https://drive.google.com/file/d/1wJ_WN1kh0rAyW0ueYjT-WKsvi
!mkdir data
!unzip precomputed_features.zip
!unzip precomputed_features/precomp.zip -d data/
```
